£10.50

£12.60 inc VAT

Product Description:

Cocos nucifera
Coconut oil is a white, solid fat with a distinctive odour. When solid coconut oil is fractionated a clear liquid oil is obtained.
It is this fractionated oil which is used as a odourless and tasteless carrier. Softening, moisturising and film-forming used in sun product and for dry and damaged hair; recommended in moisturising body oils for dry skin and for calming sensitve and delicate skin.
As a massage medium it give good slippage and remains on the skin surface for some time skin is left smooth and satin-like. It has been know to cause an allergic reaction in some people
